**PROFESSIONAL AND ELECTRICAL, FOR COMPANY AND SPORT
SIGNAGE**

Technical details: Signal Secur Prof / Sport Weight: 45 kg. Dimension: 130x70x90 cm.

The safety standard in work places required by l.d. 81/2008 and by the rules envisaged by ISO certifying bodies oblige businesses to execute and to perfectly maintain the ground level traffic sign within their permises. A suitable, cheap and pratical professional device for marking these signs by oneselves was missing. Continual requests by our costumers have induced our firm a 60 year experienced business specialized in traffic-sign machines, to designe and execut signal secur prof. This is an electric machine for marking traffic - signs in businesses, which is very small - sized, handy, pratical and easy to use. It is suitable for spraying long lasting epoxidic and polyurethane paints, capable of strongly adhering to business floors and resistant to fork - truck passage.
